Profile Summary

Information Systems graduate student pursuing doctoral research at the intersection of machine learning, responsible AI, and human-centered design, with particular interest in accessible technology.

Education

Northeastern University, Toronto Master of Science in Information Systems — GPA: 3.8/4.0	2024–2027
Centennial College, Toronto Postgraduate Diploma in Mobile Application Development — GPA: 3.85/4.5	2023–2024
Gujarat University, Ahmedabad Bachelor of Computer Applications — CGPA: 7.92/10 — First Class with Distinction	2017–2020

Technical Skills

Programming: Python, SQL, Java, JavaScript, C++ **ML:** XGBoost, Random Forest, Neural Networks, SMOTE
Systems: Database Management, System Architecture, API Integration **Tools:** Git, Azure, Power BI, AWS (EC2, S3, RDS, QuickSight)

Professional Experience

IT Data Co-op Castrol – Wakefield Canada Inc., Toronto - Support data systems and analytics work within the IT function; administer Azure environments including provisioning and access management - Built a Power BI dashboard integrating with Spiceworks to track helpdesk activity and technician performance	Jan 2026 – Present
Consultant RCIScience (Royal Canadian Institute for Science), Toronto Provided research and analytical consulting support to a science-focused nonprofit; managed a full Squarespace platform migration	Oct 2024 – Jan 2026
System Analyst Bayvape, Ajax Designed operational delivery workflows across provincial vape-stamp compliance regulations, improving delivery efficiency by 15%	Oct 2023 – Present
Business Analyst Prismetric Technologies Pvt. Ltd., India Conducted technology market research on AI adoption and digital transformation; delivered app and website migration projects for enterprise clients	2021 – 2023
Marketing Analyst Gujarat Infotech Limited, India Designed accessible interfaces and user manuals for a national pension system, improving elderly-user efficiency by 30%	2020 – 2021

Research & Technical Projects

Healthcare AI: Ensemble Learning for Clinical Prediction Built and validated ensemble ML models (XGBoost, Random Forest, Neural Networks) under severe class imbalance using SMOTE, benchmarked against clinical interpretability constraints	2025
Toronto Bicycle Thefts: End-to-End Data Pipeline & BI Dashboard Led data modeling and SQL analysis on a 3-person team (39,000+ records): designed the MySQL schema, wrote 15 analytical queries, and architected a master table for sub-second dashboard performance	2025
WeCare: Elderly Care Mobile Application Built a Flutter-based application for caregiver task management in skilled nursing facilities using persona development and iterative usability testing	2024

Certifications

SQL Certification – [LinkedIn](#) | Microsoft SQL Server – [LinkedIn](#) | Content Marketing Strategy – University of California, Davis
